**RE: Support for the Ensuring Lasting Smiles Act (ELSA)**

Dear Senator Baldwin, Senator Ernst, Representative Eshoo, and Representative Ferguson:

The undersigned organizations write to express our support for (S. 754/H.R. 1916) the *Ensuring Lasting Smiles Act* (ELSA). This bipartisan legislation will have a direct impact on patients and will eliminate the existing burdens that prevent access to necessary diagnosis and treatment for those with congenital anomalies or birth defects.

We appreciate your leadership in recognizing the importance of ensuring access to the medically necessary items and services necessary to functionally improve, repair, or restore bodily function or approximate a normal appearance due to a congenital anomaly, such as cleft lip and palate, skeletal and maxillofacial abnormalities, facial paralysis, microtia, hypodontia, and craniosynostosis.

The Centers for Disease Control and Prevention (CDC) classifies birth defects as “common, costly, and critical” and reports that approximately four percent of children in the United States suffers from a congenital anomaly. Craniofacial anomalies, for example, can restrict a patient’s ability to breathe, eat, and speak in a normal manner. Therefore, highly personalized surgery to repair an anomaly helps the patient grow and function normally. Early intervention by a team of specialists, including plastic surgeons, oral and maxillofacial surgeons, pediatric dentists, orthodontists, dermatologists and speech therapists, is necessary to assess and oversee the patient’s treatment and development, sometimes over the course of several years.

While many private health insurance companies cover the preliminary procedures, they can routinely deny or delay follow-up or corrective procedures claiming that they are cosmetic in nature— which fails to recognize the medical conditions of these patients. Delays in medically necessary care can negatively impact a child’s developmental milestones and coverage denials of a child’s reconstructive surgery can result in families turning to Medicaid, the Children’s Health Insurance Program, or other safety net programs for coverage. That is why we support the *Ensuring Lasting Smiles Act* which would require all private group and individual health plans to cover medically necessary items or services that improve, repair, or restore a patient’s anomaly – ensuring patients access to lifesaving treatments.

Thank you again for your support and leadership on this important issue. As patients, families, and health professionals, we are committed to working with you toward passage of the *Ensuring Lasting Smiles Act*.

Sincerely,
